

Synappx™ Go

Productivity wherever you go

About Synappx Go

Smartphones have changed the way we live and work, and now they can change the way we collaborate in our workplaces. With Synappx Go, you can share, scan and print your content on the go. You can also scale content easily to a large display or scan documents and release print jobs from a Multi-Functional Printer (MFP) - all right from your phone whenever and wherever.

Challenges:

- Employee behaviour is changing - ad hoc collaboration is becoming more common
- Mobile device adoption is strong - there is an increased dependency on mobile devices
- Employees are often frustrated by the many different types of technologies present
- Employees often cannot access content or connect devices when they are unfamiliar with the technology

Synappx Go advantages:

- Helps employees facilitate efficient and productive ad hoc collaboration with easy content sharing
- Uses employee mobile devices - familiar technology - to help eliminate training and safely operate commonly-shared office equipment
- Simplifies operation with one application to scan, print and display content
- Connects employees and devices - simply tap the NFC tag to access desired content on an MFP or display

MFPs and displays are more personal than ever

Synappx Go helps you do more as you move through your day, all from your phone. Make your workplace smarter and safer, leveraging the technology you have in place to facilitate spontaneous collaboration.

- Just use the app, no need to learn the equipment
- Set personalised scan settings and cloud storage access to save time
- Allows contactless operations on commonly-shared devices for key Synappx Go features

Collaboration on the go

Synappx Go helps collaboration happen anywhere and anytime with enabled displays. Your team can meet not only in a meeting room but also in a huddle area or cafeteria. Even hallways can become collaboration workspaces.

- Simply tap the NFC tag to display your content on the Sharp display
- Team members can also tap to retrieve content and collaborate
- Modified content is saved back in the original location

Helps simplify document scanning and print release

No need to learn how to use different MFPs or follow complex login procedures. Scanning documents or releasing print jobs on a Sharp MFP is easier than ever with just a few mobile phone taps on an NFC tag!

- Maximise convenience and privacy with Synappx Go print release and direct print from select cloud storage services
- Scan documents to frequently used destinations, your email address, a group of people, or select cloud storage services

Synappx Admin Portal for central management

The Synappx Admin Portal allows you to track and manage Synappx applications from one location. Here administrators gain central control of all necessary components of Synappx applications. Visualised data is available to give administrators insight into organisational trends.

Security is our number one priority

Security is always at the forefront of Sharp's innovative technology. With Microsoft® Azure, Microsoft® 365, and Google Workspace™ technologies and Sharp's security best practices, Synappx applications and services are protected by layered security. To learn more about Synappx security, download our security white paper.
